

WORK-READY UPFITS

CHRYSLER PACIFICA

Transform the Chrysler Pacifica into a fully organized mobile workspace with a storage solution designed for service, maintenance, and delivery professionals. This work-ready upfit maximizes cargo space with secure storage and fast access to tools and equipment—helping technicians stay productive throughout the day.

- 1. Secure Partition.** A full-height steel partition provides separation between the cab and cargo space to protect the driver from shifting tools and equipment.
- 2. Steel Shelving Unit.** Shelving is the foundation to keeping cargo organized and work-ready. Modular shelves can be configured to support a variety of equipment and inventory needs.

- 3. Locking Slide-Out Drawer.** Store valuable tools and equipment securely while maintaining quick access from the rear of the vehicle. The heavy-duty slide-out drawer extends beyond the cargo area for convenient loading and unloading.
